

PROPOSITION 65

Global O-Ring and Seal, LLC is a master distributor of O-Rings, Backup Rings, X-Rings, Cord Stock, and related seals, servicing industrial distributors worldwide. We stock all major compounds including Buna (Nitrile), Viton (FKM), EPDM, Silicone, Teflon, Aflas, etc.

The California Safe Drinking Water and Toxic Enforcement Act, better known as Proposition 65, lists approximately 900 chemicals that are known to cause cancer and/or birth defects or other reproductive harm. Proposition 65 requires manufacturers and distributors to provide a clear and reasonable warning before knowingly and intentionally exposing anyone to a listed chemical.

Global O-Ring and Seal is dedicated to providing safe products to our customers. Every component of mixing compound entering our supplier's facilities have been audited – including all Safety Data Sheets and Certificates of Analysis to prevent any material on the SVHC list under REACH and RoHS2 compliance. However, as it is not feasible to test against all chemicals located on the Proposition 65 list, Global O-Ring and Seal has decided to provide a warning based on the premise that one or more chemicals from the said list may be an ingredient in one or more of our products. Exposure to these chemicals may be under the Proposition 65 levels of concern or could be zero, but out of necessary caution, we have elected to publish this notice.

A handwritten signature in black ink, appearing to read 'Billy Sitz', with a long horizontal flourish extending to the right.
