

Fabric Reinforced Seals

Introduced by Johns Manville in the early 1980's, **Fabric Reinforced Seals** are widely known as **JM Clipper® Seals**.

Fabric Reinforced Seals offer similar performance as traditional oil seals, but the lack of metal eliminates issues with rust and corrosion. Damage during installation is avoided and the composite material acts as a gasket-type seal, making it effective when the bore is worn.

Profile	Profile Image	Description
LUP, LPD		General purpose. Spring-loaded.
LUPW, LPDW		Spring-loaded single lip. Designed for high runout conditions.
LDS		General purpose. Spring-loaded double lip.
H		General purpose rod wiper. Springless single lip for dust exclusion.
SS		General purpose. Springless single lip. For grease retention and dust exclusion.
